

SATISH KUMAR MANTHA

Senior Business Analyst | Solution Architect — Telecom BSS/OSS

Bangalore, India | +91 8197512116 | kumarmantha916@gmail.com

[linkedin.com/in/satish-kumar-9363862a6](https://www.linkedin.com/in/satish-kumar-9363862a6) | 17+ Years | 10+ Global OPCOs | 9M+ Subscribers | 4 Countries

PROFESSIONAL SUMMARY

Senior Business Analyst and Solution Architect with 17+ years in Telecom Business Support Systems / Operations Support Systems (BSS/OSS) — convergent billing, Customer Relationship Management (CRM), order management, and revenue assurance. Trusted bridge between business stakeholders and engineering teams: elicits and structures demand into Functional Requirement Specifications (FRS), Business Requirement Documents (BRD), High-Level Design (HLD) and business process flows, then designs and validates the solution end to end. Proven across 10+ global Operating Companies (OPCOs) — MTN, Vodafone, Ooredoo, Airtel — spanning India, Africa and the Middle East, including 9M+ subscriber migrations across 4 countries with zero revenue-disrupting cutovers. Recently delivering Agentic Artificial Intelligence (AI)-driven migration tooling. TMForum Open API knowledge, strong negotiation skills, and a track record of clean BSS go-lives.

CORE EXPERTISE

Business Analysis: Demand Analysis, Requirements Elicitation, Business Requirement Documents (BRD), Functional Requirement Specifications (FRS), High/Low-Level Design (HLD/LLD), Statement of Work (SOW), Business Process Flow Design, Gap Analysis, Feasibility & Test Design, Business Acceptance Testing (BAT) Scope & Proxy BA

Telecom BSS/OSS: Convergent Billing, Customer Relationship Management (CRM), Order Management, Product & Pricing Config, Revenue & Mediation, Subscriber Lifecycle, Assurance

Solution Architecture: Solution Design, Mediation / Integration Architecture, TMForum Open APIs, System Design Reviews, Migration Strategy & Risk Modelling

Data & Migration: Source Profiling, Extract-Transform-Load (ETL) Pipeline Design, Transformation Rules, Validation Frameworks, Cutover & Hypercare

AI & Automation: Agentic Artificial Intelligence (AI) Workflows, Claude-based Migration App, Automated Validation, AI Test-Case & Requirement Generation, Anomaly Detection

Delivery & Leadership: Agile / Scrum / SAgE, Waterfall, Stakeholder & C-level Negotiation, Cross-functional Team Leadership

TECHNICAL SKILLS

Languages: Python, PL/SQL, SQL, Shell, Scala, Spark

Databases: Oracle 11g/12c, MySQL, Cassandra, SQL Performance Tuning

Telecom Platforms: Tecnotree DCBS, Ericsson CS5/CS6, Huawei OCS, HLR, ESF, Comviva CBS, TMForum Open APIs

Integration: REST/HTTP, SOAP, XML, API Architecture, Mediation Design

AI & Middleware: Agentic AI Workflows, Claude, Kafka, Redis, Pentaho

Methods: Agile, Scrum, SAgE, Waterfall, SDLC, DevOps awareness

PROFESSIONAL EXPERIENCE

Senior Business Analyst | 6D Technologies

Jul 2024 – Present

VIL BSS Migration (Vodafone Idea) | DRC BSS Deployment (Congo) — Bangalore, India

- Primary interface between business stakeholders and engineering across billing, CRM, order management and revenue assurance; analyse demand, capture pain points, and translate multi-source inputs into concise BRD, FRS and HLD artefacts maintained through the full delivery lifecycle.
- Designed and built an Agentic AI migration application using Claude on the VIL programme — automating data migration and validation, generating requirements and test cases, and detecting migration defects/anomalies; now being extended on the DRC deployment.
- Lead full-lifecycle data migration: legacy source profiling, ETL pipeline design, transformation rules engine, validation frameworks, cutover execution and hypercare.
- Co-ordinate with design teams to assess requirement feasibility and ensure business intent is reflected in final solution design; review billing and mediation process architecture across business and engineering tracks.

- Define BAT scope and test cases with business and QA; act as proxy business and drive BAT alongside Product Owner and Test Lead; validate business outcomes during post-go-live hypercare.
- DRC: leading a complete new-country BSS deployment — billing implementation, subscriber onboarding lifecycle, legacy data migration and stakeholder governance.

Tecnotree Convergence Ltd. | Bangalore, India | Dec 2008 – Apr 2024 (15+ Years)

Progressed across five roles — Software Engineer to Solution Architect. OPCOs: MTN Ghana / Nigeria / Iran / Uganda · Ooredoo Oman · Vodafone · Airtel & more.

Solution Architect | **Tecnotree**

Apr 2019 – Apr 2024

- Led the full solution lifecycle for the Digital Convergent Billing System (DCBS) across 10+ global Operating Companies (OPCOs) — requirement analysis, solution design, stakeholder negotiation and sign-off.
- Documented complete business requirements (FRS, HLD, LLD, SOW) for convergent billing across MTN Nigeria, Uganda, Ghana and Iran — achieving zero-disruption legacy CRM/OMS cutover across 4 countries.
- Championed TMForum Open API integration on the Convergent Billing Module; documented CBS → CS5/CS6, OCS and HLR interface specs enabling multi-OPCO interoperability.
- Introduced a Mock Billing engine requirement, eliminating upstream billing defects and significantly reducing post-go-live revenue-dispute resolution time.
- Drove Business Acceptance Testing (BAT) as proxy business with Product Owner and Test Lead on MTN Ghana, Nigeria and Iran go-lives; championed Agile/Scrum across multi-geography teams.

Senior Business Analyst | **Tecnotree**

Dec 2015 – Mar 2019

- Elicited and documented business requirements (BRD, FRS, HLD) for convergent billing, CRM and order management across MTN and Ooredoo programmes.
- Designed subscriber-lifecycle business process flows — activation, modification, suspension, termination and bill payment; defined BAT scope and acted as proxy business during testing and go-live.
- Ran customer workshops and stakeholder interviews; negotiated scope with operational and C-level stakeholders.

Technical Lead | **Tecnotree**

Dec 2012 – Nov 2015

- Led a development team delivering DCBS billing and mediation modules across multiple global OPCOs; owned technical design, code quality and integration with CS5/CS6, OCS and HLR.
- Coordinated with business and QA teams on solution feasibility, defect resolution and go-live readiness.

Senior Software Engineer | **Tecnotree**

Dec 2010 – Nov 2012

- Owned development of convergent billing and rating components on Tecnotree DCBS; optimised SQL/PL-SQL performance and built mediation and batch processes.
- Supported integration with CRM, Online Charging System (OCS) and Home Location Register (HLR) across multiple operator rollouts.

Software Engineer | **Tecnotree**

Dec 2008 – Nov 2010

- Developed and maintained PL/SQL procedures, SQL queries and shell scripts for telecom billing batch operations on the DCBS platform; contributed to defect fixes and performance tuning across early OPCO deployments.

Software Engineer | **Tata Consultancy Services**

Aug 2007 – Oct 2008

- Optimised SQL query performance and developed PL/SQL stored procedures and shell scripts for telecom billing batch operations.

SELECTED ACHIEVEMENTS

- Migrated 9M+ subscribers across 4 countries with zero revenue-disrupting cutovers.
- Built a production-track Agentic AI migration app (Claude) automating validation, test-case generation and anomaly detection on the Vodafone Idea programme.
- Awards: Star of the Month; Team of the Quarter; Key Resource (Tecnotree); Customer Award (TCS).

EDUCATION & CERTIFICATIONS

B.Tech, Electrical & Electronics Engineering (EEE) — Sri Venkateswara University, Tirupati

2006

- ITIL Foundation Certified
